

ErrorLog Palindrome

```
30 boolean isPalindrome = true;
31
32 for (int i = 0 i < phrase.length() / 2; i++) {
33     if (phrase.charAt(i) != phrase.charAt(phrase.length() -
```

An error occurred here and as i analyzed i realized i forgot to put a semicolon after 0.

```
34 if (phrase.charAt(i) != phrase.cha
35
36 isPalindrome = False;
37 break;
```

I was supposed to use a lowercase F for my false statement.
