

### **Instructions:**

1. Click on File -> Make a copy

**Include your IPO Chart with your code in Eclipse IDE:** We will discuss and demonstrate this in the computer lab.

## **IPO CHART**

<b>Program name:</b>	<b>[TYPE PROGRAM NAME HERE]</b>	
<b>INPUT</b>	<b>PROCESS</b>	<b>OUTPUT</b>
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User will be prompted to enter their first and last name.	The program will look at the first letter of each user's last name to decide which group they belong to. Each letter will match a specific group. Last names starting with A to I might be in Group 1, while J to S goes to Group 2, and T to Z will be in group 3. This way, users are easily grouped based on the first letter of their last name.	The screen will display the users first and last name and what group they are assigned to.
